① 准备小图标 (iconfont图标库获取)

```
link
 rel="stylesheet"
 href="https://at.alicdn.com/t/c/font_4090357_z2qpnic06um.css"
>
                                                                 <div class="menu">
 <div class="btn"><i class="iconfont icon-add"></i></div>
  <span style="--i: 0;"><i class="iconfont icon-home"></i></span>
  <span style="--i: 1;"><i class="iconfont icon-more"></i></span>
  <span style="--i: 2;"><i class="iconfont icon-gift"></i></span>
  <span style="--i: 3;"><i class="iconfont icon-setting"></i></span>
  <span style="--i: 4;"><i class="iconfont icon-message"></i></span>
  <span style="--i: 5;"><i class="iconfont icon-cart"></i></span>
  <span style="--i: 6;"><i class="iconfont icon-money"></i></span>
  <span style="--i: 7;"><i class="iconfont icon-star"></i></span>
</div>
                              添加字体图标
```

```
②设置基本样式
```

```
margin: 0;
 padding: 0;
 list-style: none;
body {
 display: flex;
 justify-content: center;
 align-items: center;
 min-height: 100vh;
 background:
 linear-gradient(45deg, deeppink, skyblue);
```

内容居中,设置渐变

```
.menu {
  position: relative;
  width: 200px;
  height: 200px;
  background-color: orange;
  display: flex;
  justify-content: center;
  align-items: center;
}
```

```
.btn {
 position: absolute;
 z-index: 1000;
 width: 60px;
 height: 60px;
 background-color: #fff;
 display: flex;
 justify-content: center;
 align-items: center;
 border-radius: 50%;
 box-shadow:
     0 3px 4px rgba(0, 0, 0, 0.15);
   圆角/阴影
```

### ②设置基本样式

```
.btn i {
  font-size: 32px;
}
```

注意:字体图标的文字大小,需要直接作用于该元素才生效

```
.menu span {
  width: 40px;
  height: 40px;
  background-color: #fff;
  box-shadow:
    0 3px 4px rgba(0, 0, 0, 0.15);
  position: absolute;
  left: 0;
}

    ひ置八个按钮样式
```

```
.menu span {
    display: flex;
    justify-content: center;
    align-items: center;
    border-radius: 50%;
    cursor: pointer;
}
八个按钮: 居中/圆角
```

③ 设置 hover 旋转效果

```
.menu span {
 transform-origin: 100px;
 transition-delay:
    calc(.1s * var(--i));
 transition: .5s;
.menu:hover span {
 transform:
  rotate(calc(360deg / 8 * var(--i)));
hover 时候, 动态旋转图标
```

③ 设置 hover 旋转效果

```
.menu span {
    transform:
    rotate(0deg) translateX(80px);
}

默认 8 个图标居中显示
```

③ 设置 hover 旋转效果

```
.menu span i {
    transform:
    rotate(calc(360deg / -8 * var(--i)));
}

ひ置 8 个图标自带负角度,
保证转过来是正的
```

③ 设置 hover 旋转效果

```
.menu {
 /* background-color: orange; */
.btn {
 cursor: pointer;
 transition: all 1.25s;
.menu:hover .btn {
 transform: rotate(315deg);
```

2. 中心按钮,设置辅助旋转效果

### 本章步骤小结:

- ①准备图标结构(一个按钮,八个图标)
- ②设置样式(大盒子居中,图标定位)
- ③ 设置 hover 旋转 (定位到左侧, 绕中心点旋转)

### 本质揭秘:

小图标定位到左侧,绕中心点旋转
