①准备太阳盒子的基本结构样式

```
<div class="ball"></div>
.ball {
  width: 200px;
  height: 200px;
  background-color: pink;
  border-radius: 50%;
  position: absolute;
  left: 50%;
  top: 50%;
  transform: translate(-50%, -50%);
   定位居中
```

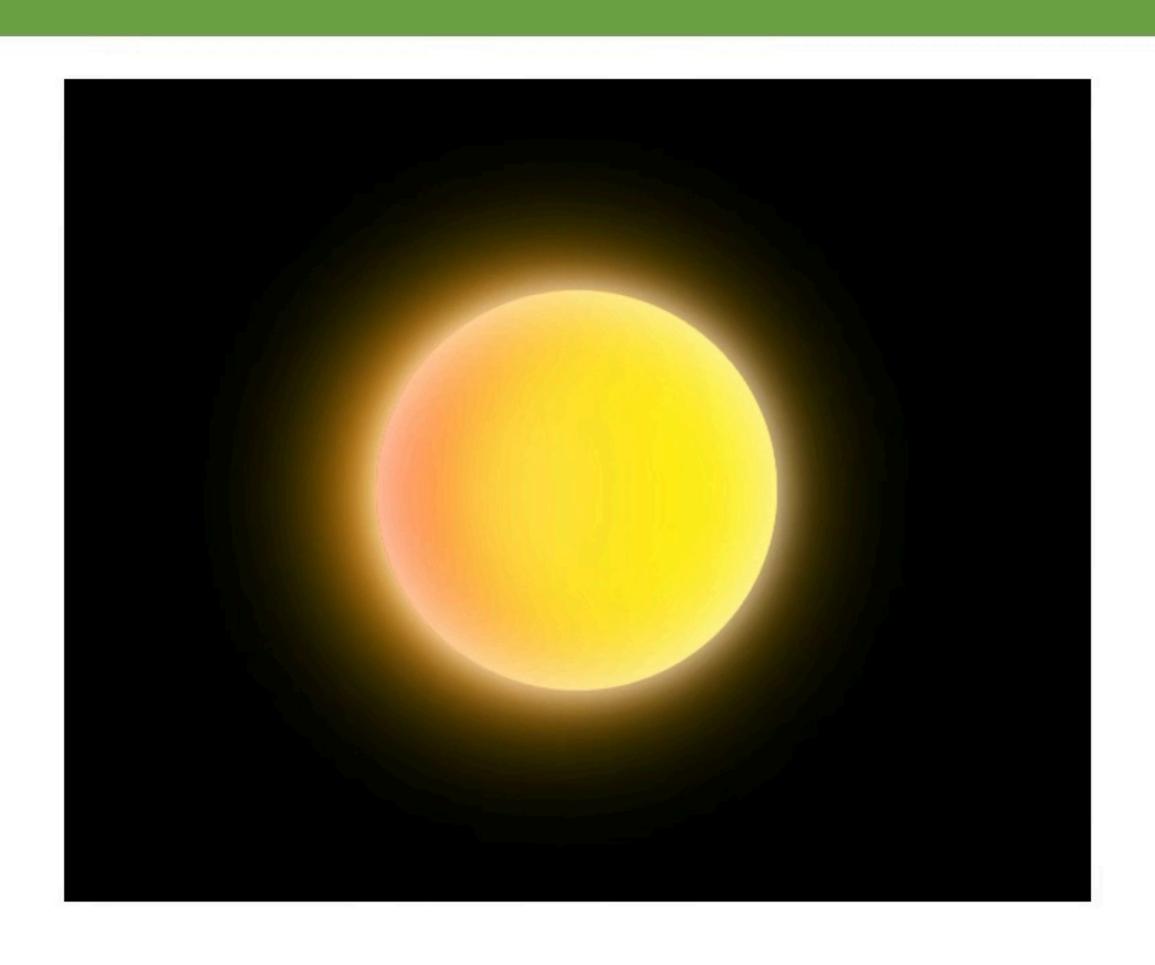

```
② 设置背景底色,设置太阳光影
<div class="ball"></div>
body {
  background-color: #000;
.ball {
  box-shadow: 0 0 20px #fff,
    -10px 0 80px #ff0,
    -10px 0 40px #ff2039,
   inset 0 0 50px #fff,
   inset -50px 0 80px #ff0,
    inset 20px 0 50px #ff2039,
    inset -50px 0 200px #ff0,
   inset 20px 0 50px #ff2039;
```

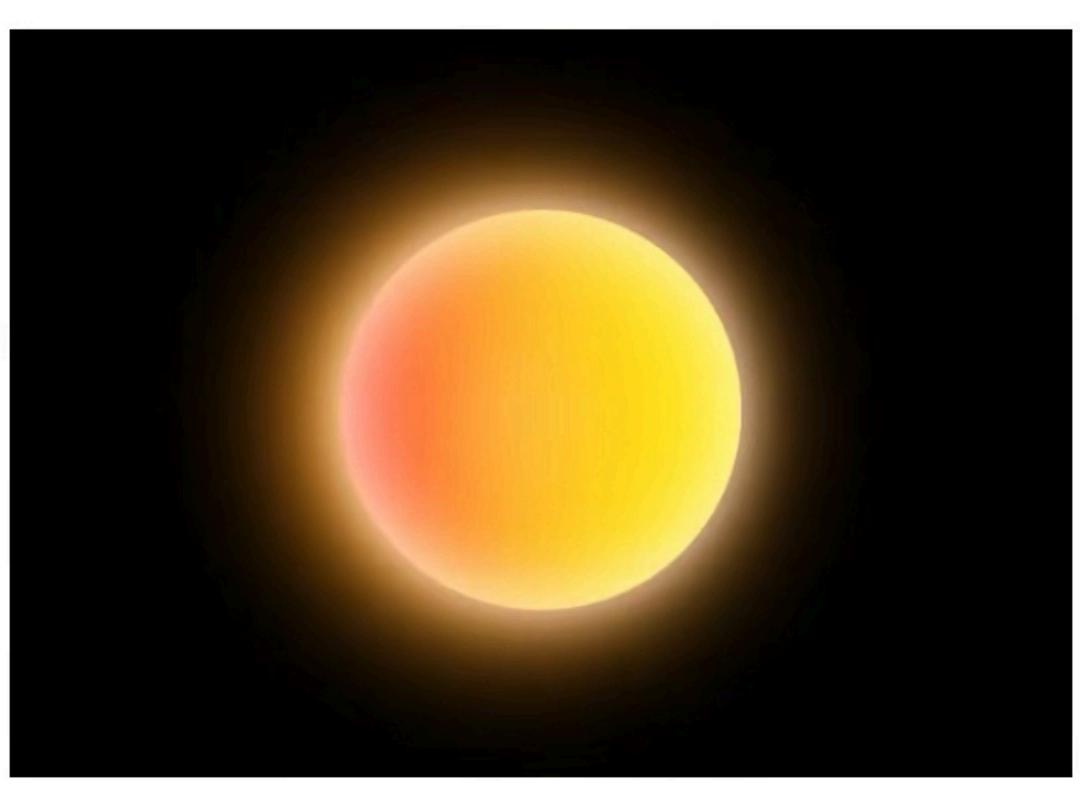

多重阴影

```
③设计太阳动画
<div class="ball"></div>
@keyframes sun {
  50% {
    box-shadow: 0 0 50px #fff,
    -10px 0 80px #ff2039,
    -10px 0 80px #ff0,
    inset 0 0 50px #fff,
    inset -50px 0 80px #ff0,
    inset 50px 0 80px #ff2039,
    inset -50px 0 200px #ff2039,
    inset 50px 0 200px #ff0;
   设计动画,微调光影
```

```
③设计太阳动画
```

本章步骤小结:

- ①准备太阳盒子的基本结构样式
- ②设置背景底色,设置太阳光影(多重阴影)
- ③设计太阳动画(光影位移)

本质揭秘:

- ①多重阴影
- ② 动画光影位移
